Shantanu Narayen

Chairman, president and chief executive officer
Adobe

Preserving the status quo is not a winning strategy. As Adobe CEO, this core belief drove Shantanu and his leadership team's successful transformation of Adobe, moving its creative software franchise from the desktop to the cloud, while creating and leading the explosive digital marketing category. The move to bring content creation and data insights together into one end-to-end offering set the standard by which other industry players compete.

Building on this transformative strategy, under Shantanu's leadership Adobe has achieved record revenue and wide industry recognition, making it Fortune's Most Admired Company in the software category, one of Interbrand's Best Global Brands, and a leader in sustainable and ethical business practices.

Although he originally wanted to be a journalist, Shantanu embarked on the more "expected" career path of engineering while growing up in Hyderabad, India. After coming to the U.S. to earn his master's degree, he held product development roles at Apple and Silicon Graphics before co-founding an early photo-sharing startup called Pictra. A chance business encounter between Adobe and Pictra led to Shantanu joining Adobe in 1998, where he rose swiftly through the product ranks. He became president and COO in 2005, CEO in 2007, and chairman of the board in 2017. Shantanu is passionate about building and empowering teams to drive product innovation and scale Adobe's business globally.

Shantanu was named one of the world's best CEOs by Barron's Magazine in 2016 and 2017. He is a member of several boards, including pharmaceutical giant Pfizer, and the Adobe Foundation, which funds philanthropic initiatives around the world. He is currently the Vice Chairman of the US-India Strategic Partnership Forum. He served on the President’s Management Advisory Board from March 2011 to January 2017.

Shantanu has a bachelor's degree in electronics engineering from Osmania University, a master's degree in computer science from Bowling Green State University and a master's degree in business administration from the University of California at Berkeley's Haas School of Business. He holds five patents.
