

Adobe® LiveCycle® Content Services Mobile

APPLIES TO

Adobe LiveCycle Content Services Mobile for iPhone

April 2010

Adobe LiveCycle Content Services Mobile enables you to use your Apple iPhone to browse, open, and email files that are stored in your organization's WebDAV server. Supported servers include LiveCycle Content Services ES2 and Microsoft® SharePoint® 2010.

System requirements

Server

In order to use Content Services Mobile, your organization must have properly installed and configured Adobe LiveCycle Content Services ES2, Microsoft SharePoint 2010, or another supported WebDAV server.

A LiveCycle administrator must assign the LiveCycle Contentspace User role (or another role with the Contentspace Console Login permission) to all Content Services Mobile users.

iPhone

LiveCycle Content Service ES2 Mobile is designed for iPhone OS 3.0 and higher.

License information

You can find an End User License Agreement for LiveCycle at: <http://www.adobe.com/products/eulas/#server>.

Setting up Content Services Mobile

This section describes how to configure Content Services Mobile on your iPhone.

Launching the application

The application can be downloaded from the App Store. After installing the application, the Content Services Mobile icon appears on your iPhone. Tap the icon to launch the application.

Logging in to the server

When you launch the application for the first time, a splash screen appears briefly, followed by the login screen.

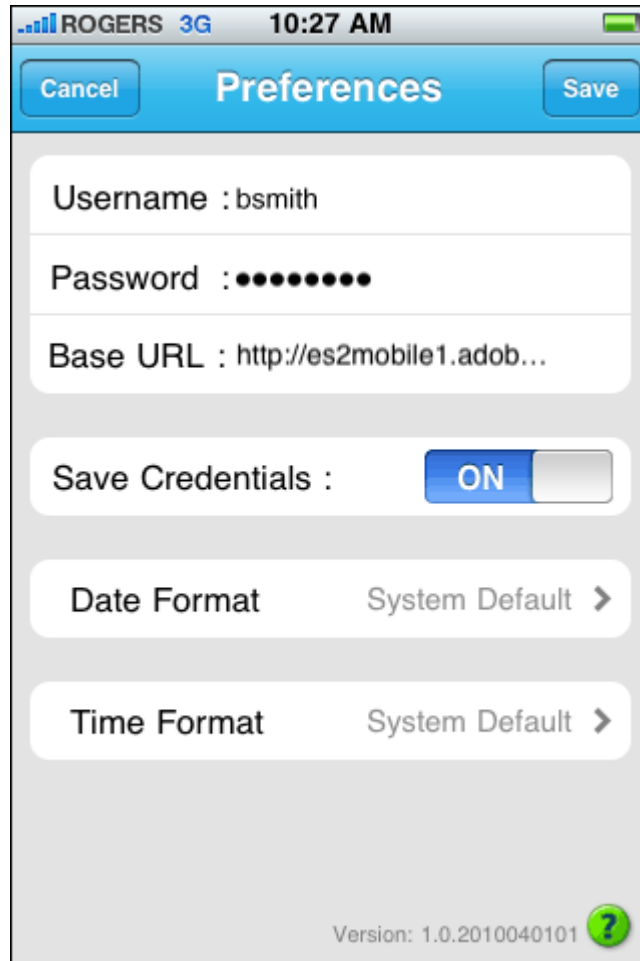

The screenshot shows the login interface for Adobe LiveCycle Content Services Mobile. At the top, the status bar indicates 'No Service' and the time '10:22 AM'. The main header features the 'LC' logo, the text 'ADOBE® LIVECYCLE® CONTENT SERVICES MOBILE', and 'Version 9.0.0'. The login form consists of three input fields: 'Username' with a placeholder '<Enter username>', 'Password' with a placeholder '<Enter password>', and 'Base URL' with a placeholder 'http://<lcserver>/con...'. Below these fields is a 'Save Credentials' toggle switch, which is currently turned 'ON'. At the bottom of the form is a 'Login' button. A green question mark icon is located in the bottom right corner of the screen.

► To log in to Content Services Mobile:

1. Specify your LiveCycle ES2 username and password.
2. Specify the Base URL of the LiveCycle Content Services ES2 server. Contact your administrator if you do not have the necessary information. The default URL is `http://[LiveCycle server]/content space/webdav`.
3. To save the login information, slide the Save Credentials slider to ON. The next time you open the application, you will not be prompted to log in and the last page you accessed will be displayed.
4. Tap Login. The Contents screen appears.

Setting preferences

When you click the  icon on the Contents screen, the Preferences screen is displayed.

► To set your preferences:

1. Specify your LiveCycle ES2 username and password.
2. Specify the Base URL of the LiveCycle Content Services ES2 server. Contact your administrator if you do not have the necessary information. The default URL is `http://[LiveCycle server]/contentspace/webdav`.
3. To save the login information, slide the Save Credentials slider to ON. The next time you open the application, you will not be prompted to log in and the last page that you accessed will be displayed.
4. To change the format used to display dates on the Details screen, tap Date Format, select a new format, and then tap Preferences.
5. To change the format used to display times on the Details screen, tap Time Format, select a new format, and then tap Preferences.
6. Tap Save to save your changes, or Cancel to discard them. The Contents screen appears.

Note: Tapping  displays the Content Services Mobile page on the Adobe website. The page includes a link to this document.

Accessing files

You can open the following types of files using Content Services Mobile:

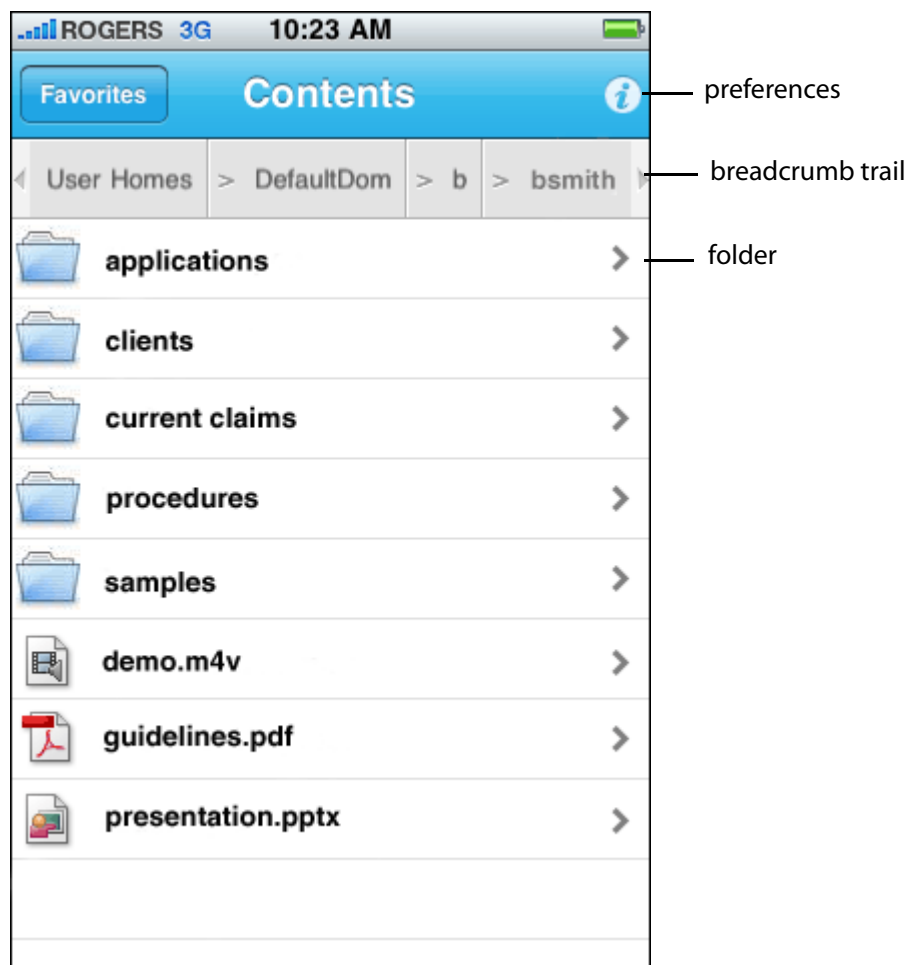

- PDF documents (PDF)
- Image files (JPG, JPEG, PNG, BMP, BMPF, GIF, TIFF, TIF, SVG, XBM)
- Video files (M4V, MP4, MOV)
- Microsoft Office documents (DOC, DOCX, DOCM, DOTX, DOTM, PPT, PPTX, PPSX, POTX, POTM, PPTM, XLS, XLSX, XLSM, XLTX, XLTM)

Content Services Mobile displays the names of any unrecognized files in your folders. You can use the Send button to send those files via email, but Open button is unavailable.

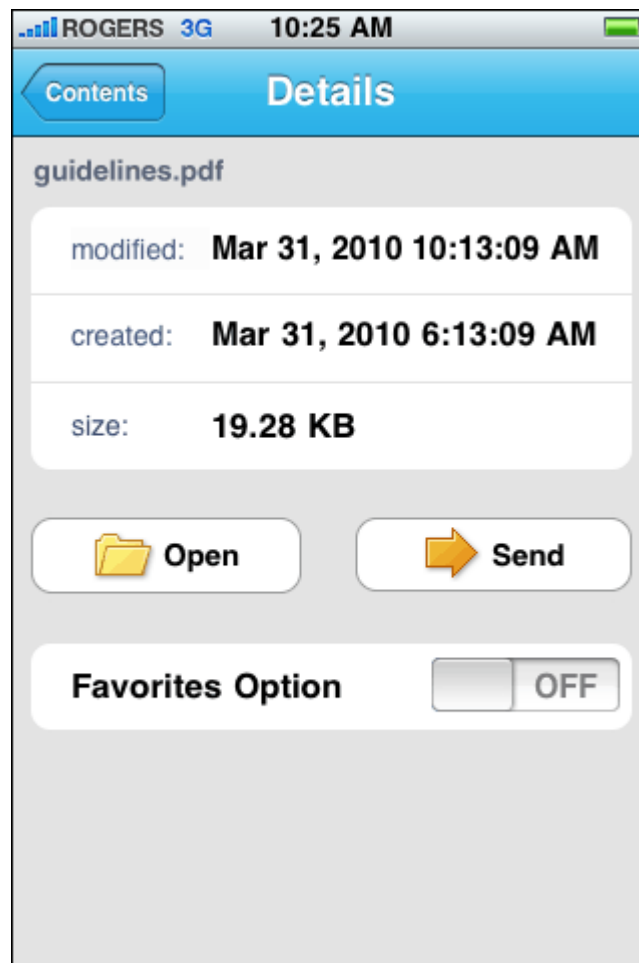

Note: The files are not editable.

Browsing and opening folders and files

The Contents screen enables you to browse through a folder structure to locate files. Tap folders to open them. To return to a previous folder, tap the folder name in the breadcrumb trail. You can slide the breadcrumb trail from side to side if the folder you are looking for is hidden. To access your list of favorite files, tap Favorites.

When you tap a file name, the Details screen appears. To open the file, tap Open.

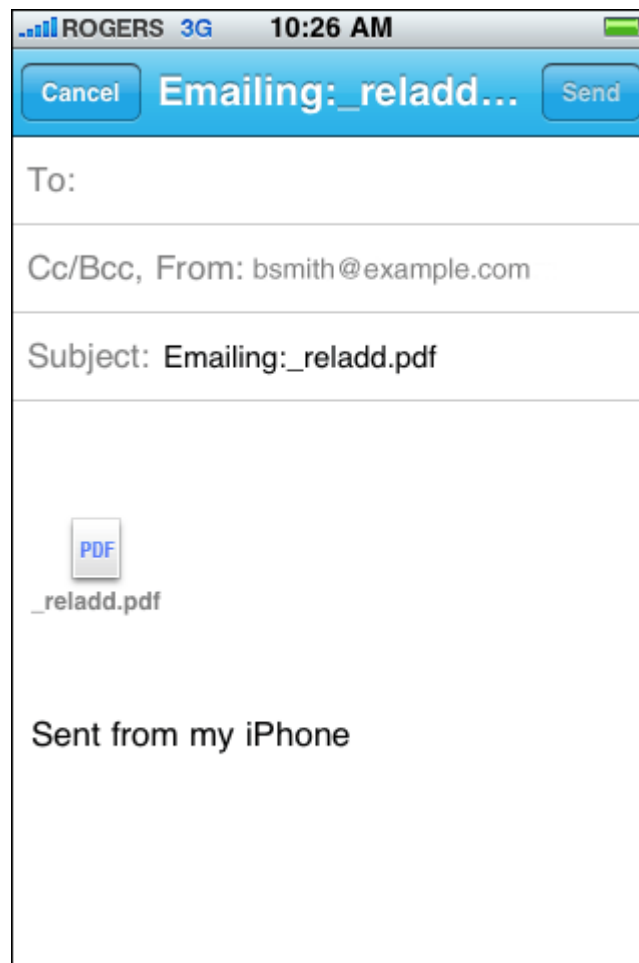

Sending files via email

You can send a file as an email attachment.

► **To send a file:**

1. On the Contents screen, tap the file name. The Details screen appears.
2. Tap Send.

3. A new message is created in the iPhone native email application, with the file as an attachment.

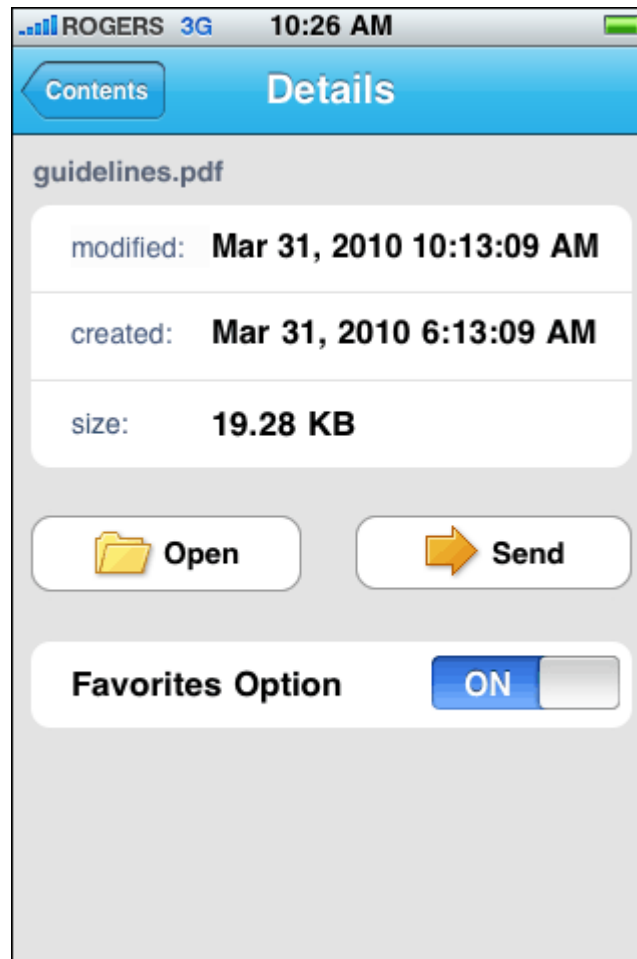

4. Specify the To address and fill in the other fields as appropriate. You can edit the subject line and add text to the body of the email message.
5. Tap Send.

Marking files as favorites

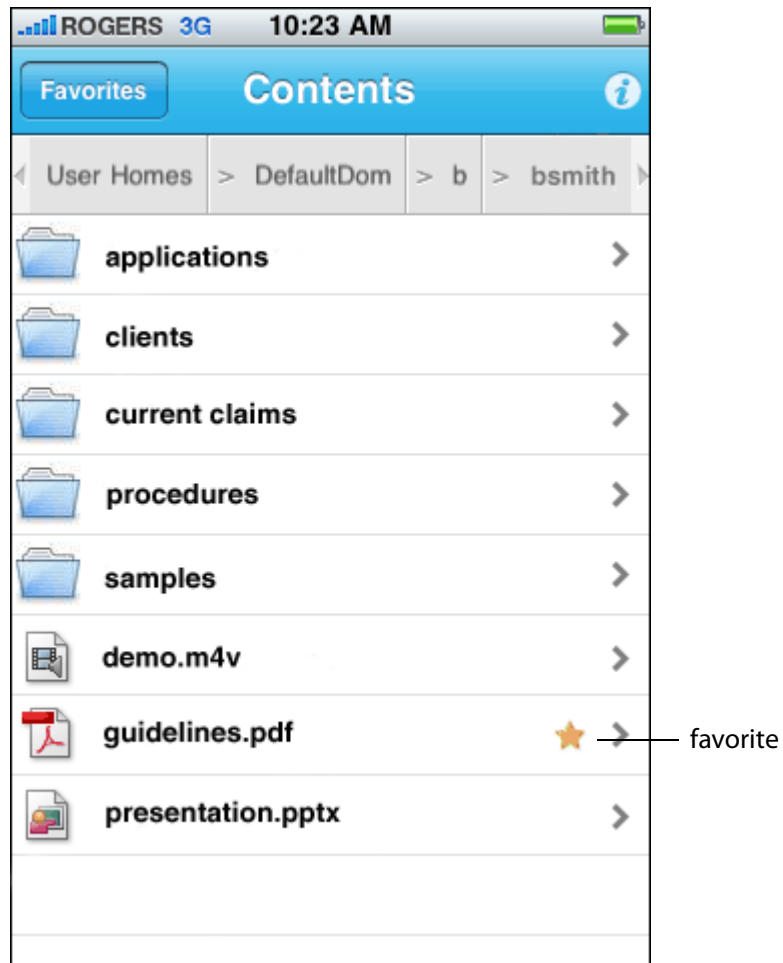

You can create a Favorites list that contains links to files that you use often. You cannot add folders to the Favorites list.

► **To mark a file as a favorite:**

1. On the Contents screen, tap the file name. The Details screen appears.
2. Move the Favorites Option slider to ON.

3. Tap Contents. The file name now has a star icon beside it, indicating that it's a favorite.

► **To access your favorite files:**

1. On the Contents screen, tap the Favorites button.
2. The Favorites list appears. You can tap a file to access it, or tap Contents to return to the Contents screen.
